Dungeon Ladder To make the PvE aspect in Flyff more competitive, we have listed a ranking for the 20 fastest successful heroic dungeon runs. The best of the best receive special rewards to increase the appeal of being the best. Madrigal leveling Take a change of scenery when leveling to re-visit Darkon. Mobs are stronger than before and hit harder, but also offer more experience and penya. Spawns have been vastly improved, making leveling here dangerous but rewarding. Achievements Nothing to do in Flyff? We know that feeling and never want to let you get bored. Therefore we have added lots of unique achievements where you have to fulfill certain tasks to unlock them. Great rewards are waiting for you. Unisex Armorparts We've removed all gender requirements from equipment parts. You don't have to wait for the right equipment gender drop anymore! Female characters will see the female set icon and male characters the male one. Of course the items will retain their look! Improved upgrading Upgrading can sometimes be very annoying and frustrating. That's why we thought it was time for change. From now on you don't have to add new items every 10 attempts and you can sit back and relax while your item is being upgraded. To the unlucky ones among you: After a certain number of attempts you will get a 100% chance of success. New party loot distribution option: Roll On the dungeon settings tab of the party window you can now select "Roll" for item distribution. When a rare piece of loot drops, a dialog window will pop up for all party members. The window shows an icon of the item that you can mouse over for the info, a 25 second timer and 3 options: Need, Greed and Pass. Need: Players can only "Need" on items their class can use. If multiple players click need, the game rolls a dice (1-100.) The highest rolling player is given the item. If only 1 player clicks need then they are given the item and no dice roll is made. Need has priority over Greed. Greed: greed works the same as need: if multiple players click greed then the highest dice roll wins; if only one person "Greeds" the item then they are given it without a dice roll. Pass: if a player clicks pass then he will not receive the item. Players automatically "Pass" if no choice is selected in the 25 second time limit. If all players pass then the item is returned to the player who first picked it up. Guild Donating Improvement You can now automatically donate X% of your penya drops to your guild! Just go to the Guild Contribution window and select the amount you want to donate. Reworked Ringmaster Hero Skill Since the Ringmaster Hero skill has been pretty useless, we decided to rework it. It will apply all available Ringmaster buffs on the target or yourself. Daily Quests Daily quests are a set of repeatable quests that have players doing various small tasks around the world. Completing your daily quests helps to level up your guild. Quality of Life OVER 9000!!! Yes we are serious about QoL improvements. Here are just a few of them: Guildbank sorting, Guildbank search, Last seen in messenger, reworked guild permissions, stackable beads, improved guild messenger tab, party merging, highlighted awakes, easy channel switch, item linking in private chats and many many more that can't be all listed. Supported ingame languages are English and French. You can change the language ingame or in the patcher. Having many chat messages won't cause any FPS drops! New Wiki Navigating System | Acronyms | Choosing the right class | Deleveling | FAQ | Guilds | Instance Dungeon Aggro System | Interactive Map | Interface | Leveling | Logon Character Pin Window | Mail System | New Player Guide | New Pang Tutorial | Party | Pets | Scamming Before game play is even attempted, it is necessary to create an account. You can click the button on the Webzen.com homepage. It is very important that you fill out the correct information, not only to make your account usable, but also due to any problems that might occur in the future (such as lost passwords). Accessing the Game Login Screen After running the patcher, click the "Play" button. This will open up the GameGuard patcher. It helps prevent things such as hacking, cheating, and so on. This screen will take a variable amount of time to get past, depending on connection speed. (Once it downloads the first time, until it is updated again, its load time decreases significantly.) The login screen allows you to access your account (and their associated characters) and the game itself. The account field is where the name, selected at registry, is put. This is also e-mailed to the e-mail provided in the registration. The password field is the password, chosen by the user. There are no automated passwords. Make sure to write the password down, it is not e-mailed in the verification e-mail. It is very important to make sure the account is activated, or upon logging in, it will claim it does not exist. Other than the Logon button, there are several other buttons. About Flyff gives information such as current version, and copyrights of the game. Story tells the background story of the game, in chapters, to make the game flow a little bit easier. Quit closes the game client completely. Clusters and Channels Once you log-in, you'll be taken to the Select Server window. Here, you will find a list of available Clusters (or Worlds) that are available for play. Each Cluster is a separate world where your characters will live. Once a cluster is chosen, a channel can be chosen. Currently there is only one cluster that allows world PvP, and it's marked with (PK) after the cluster name. It is very important to note that, when selecting a server to create your character on, this character will only be accessible on this server. You are allowed 3 characters per cluster per account. If a player wishes to switch clusters, they must start over. Additionally, all items (including cash shop), are not capable of being transferred. Please do not e-mail asking for items to be moved, the request will be denied. Characters will not be switched upon asking. Channels however, can be switched as frequently as the player wants. When switching, all items remain where they were, there are no penalties. Once a Cluster and Channel are chosen, hit the Next button to continue. Character Creation Upon logging in, for the first time, there will be three open slots for brand-new characters. Just click on one of the slots and then click "Create" to begin personalizing your very own character. The character creation window is very simple. Just follow these four simple steps: Give the character a name. If you are curious if something isn't allowed, or why a name isn't capable of being selected, view the list of Forbidden Names. Names are also case-sensitive. Select a gender for your character. Select the hair style. There are several default hair styles that are allowed, but then can be changed in game. You can change the color and the styles in game. Give your character a face. There are a few faces, all different. These can be changed in the game as well. After you click Ok, it will return you to your account window, where it will show your newly created character. This character will always be in the selected slot. To start playing, click on a character and click the Accept button. This will open the pin window. The order of the numbers are random. Enter the bank pin you used in Character Creation Window. To Delete Your Character: At the character selection window, select the character that you wish to delete and press Delete. While characters can be restored, they must start over. Additionally, all items will be cleared. Please do not delete characters just to ask them to be restored. Note: This option has been disabled. First Step into the Flyff World The first time a character logs on, it will be asked if it wants to follow the guide. The guide is a small penguin in the corner of the screen. This penguin, named Pang, helps teach players how to do things in the game. You can switch off this guide if you wish as everything will be reiterated here, however it is recommended that you keep it for your very first character. Adjusting Your Options To access your Options Window, just click on Menu [bottom left] and select Options [2nd from the bottom] Setting Description Recommendation Video Option - Field Detail Adjusts how much detail the landscape will appear on your screen. Low Video Option - Object Range Adjusts how far away an object will appear on your screen. Low Video Option - Object Detail Adjusts how much detail the landscape will have. Low Video Option - Shadow Detail Adjusts how much detail the shadows will have. Low Video Option - Item Effect Window Effects - Transparency Makes windows on your screen semi-transparent. Unchecked Sound Option - BGM Most areas of the Flyff have its own customized music that will play when you fight. There is also music for flying. Many players highly enjoy the Flyff BGM's. Preference Sound Options - Sound Effect All spell and fighting sounds are considered Sound Effect. This also includes sounds made by monsters and your character. Preference Sound Options - Battle Music Enables to play different background music when battling a mob. This is only effect when the BGM is turned on. Preference Keyboard Mode - Basic Mode Enables walking backwards when ticked. Preference Getting Acquainted with the Interface The interface is very user-friendly. It is comprised of a short-cut bar, messaging box, and various windows that can be toggled with shortcut keys to access game features. Short-Cut Bar The short-cut bar is split into 4 sections. (View the interface at the right for reference). The section to the left - is a click-bar. You can place equipment, items, and skills into each slot, distinguished by the dot. To equip or use the items, just click on them once. The section in the middle - is your F-key bars. There's a total of 3 bars available, and you can switch between them by pressing ` on your keyboard. Essentially this bar works exactly like the click-bar, however this time your slots are associated with an F-key indicated right above the slot. This means easier access. Many players use these bars for often used items and skills. The section to the right - is your character status. Here you can see your HP, MP and FP. The section to the far right - is your Action Slot. This is used only for skills with no cool-down (further explanation of cool-downs in Leveling as a First-Class). By using the action slot, your skills will be cast in succession faster than their normal casting rate. The maximum amount of skills you can put in it is 6. However, the action slot has a cool-down. The more you use it, the more area becomes greyed out. The greyed out skills cannot be used at all. Thus, usually it is recommended to not have 6 skills in the action slot unless you have an Activation Scroll. Note that you can also place the "S" icon into a click-slot or F-slot to use the action slot that way. The Action Slot can also be used if you press "C" on the keyboard when you aren't chatting. Messaging Box The message box is your primary tool to really interact with players. To use the message box, just press enter and a cursor will appear in the text field. While you can use the message box for various in-game functions, we will just concentrate on communication in this section. There are essentially 5 available chatting channels. Each channel has its own colored font, and using the filtering options you can choose which channels you wish to view and talk in. To switch between the channels, just click the icons above the typing field. Additionally, you can still input messages into other channels with the use of certain commands (listed below) which you place before your message. While you are in a particular channel the command is automatically inputted for you when you enter into the text field. Message Box Chat - This channel is for public chat. With this option open you'll see all the other options too if they occur. Whisper - One of the private ways to communicate with an individual. The command for the whisper channel is /w, to utilize this command just type: /w PlayersName YourMessage. The font for whispers is yellow Shout - The shout channel expands the range of your message to areas far beyond that of public chat. The command is /s With the use of a Full Shout 15 (Cash Shop Item), you can expand your range to that of the entire server. Many players use this channel as a marketplace and also to look for potential fighting partners. The font for shouts is pink Troupe - The troupe channel is where you can contact your party members. The command is /p. You can communicate with your party no matter where they are. You can only use the option if you are in party. If you aren't in a party, you'll get a message that you aren't in one. The font for shouts is green. Guild - The guild channel is where you can contact your Guild members. The command is /g. You need to be in a guild to use and join the guild chat. You can communicate with your guild no matter where they are. The font for shouts is light pink Chatting Filter To adjust the filters of any particular channel, just select that channel and press the button Filter at the right side of the box. Chatting Channel - Here, check box the channels that you want to be able to read in this particular channel. Notice that you cannot un-check the original channel that you are adjusting the filter for. (ie. In the Chat channel, you cannot General (or public chat) is greyed out. Accessing other Game Features/Windows All game features on Flyff are accessible via the Start Menu, and most are accessible via Hot Keys. Please view the Hot Key page for information about the windows accessible with this method. The Menu button is on the bottom left-hand corner of your Flyff Interface. All items in the listing with a letter on the right hand side are available by Hot Key. We will only be talking about the ones not available by Hot Key in this section. 5 min. teleport Moving Around After you learn to move, you can start learning to fight. Visit the Combat page to learn how to fight against monsters. Killing monsters gives you experience, which allows for leveling The Geography of the Flyff World The city your character first starts in is called Floris. The large light is called a Lodestar. Leveling as a Vagrant The first monsters many people fight are Albatts. As you level, you can insert points into the Character Stat window. This is accessible by hitting H. Level 1-15 Guide and Choosing the right class are good guides to look at. There are many Hot Keys players can use to increase, and monitor game play. Click, or search Hot Keys to view this list.
